BRAND STORY PKCELL

Mr Lee Zhijiang

The brand story starts when Mr Lee Zhijiang, a physics engineer, set up Shenzhen PKCELL Battery CO., Ltd in 1998. Till to now, PKCELL has developed as a renowned battery manufacturer leader at domestic and overseas. The brand comes from Power King CELL. It means the King of power battery.

In 1997, Mr Lee was a senior engineer working in Chinese Physics research institute. One day he went to a small town for business. Unfortunately, the hotel happened to power outage when he was in urgent need of writing a document at that night. Furthermore, the flashlight was power off soon. He ran across several streets but failed to find suitable battery there.

Immersed in thought in darkness, he wondered if he could produce long-lasting batteries and spread them all over the world, it would be convenient to more people.

In the second year, He resolutely resigned his originally stable job regardless of his relative's and friend's dissuasion. Then, he came to ShenZhen to realize his dream and finally set up PKCELL Brand.

Innovation is not only the core competitiveness of manufacturing, but also the soul of PKCELL's continuous development. PKCELL specializes in battery manufacturing over 16 years, pursues excellence and perfect balance of science and technology innovation, keeps learning, updates technology, and constantly develops a series of strong and environmental-friendly battery. PKCELL is not only a creator in the field of battery, but also the founder of better life.

COMPANY PROFILE

Shenzhen PKCELL Battery Co.,Ltd

Shenzhen Pkcell Battery Co. Ltd is one of the largest battery manufacturing enterprises in China for its biggest production scale, most advanced equipments and fullest ranged product varieties. The workshop and office are set up in four huge buildings with total gross floor area of 28,000 square meters. Pkcell has about 400 staff including 30 professional technicians and 50 quality management personnel. Equipped with about 18 sets high speed automatic production lines and quality inspection equipment. Our annual battery output is up to 500 billion pieces.

We mainly produce alkaline battery, super heavy duty battery, alkaline button cells (AG) and lithium button cells (CR), LI-SOCL2 battery, LI-MnO2 battery, NI-MH/NI-Cd rechargeable battery and chargers. Those products are widely used in the industry of telecommunication, digital products, MP3, R/C toys, medical instruments, lightning devices and household application etc.

1 SMALL MOQ. any quantity is ok.

2 Specialized battery manufacturer for over 20 years.

3 Various batteries model and package available

4 Best service, have branch in United States and Canada.

5 Professional marketing, selling training and advice.

6 Free promotion items.

Li-SOCL2 Battery

Characteristics

- High-voltage(3.6V)
- The specific energy(500wh/kg) and energy density(1000wh/dm³) are very high
- The discharge voltage is very stable
- Wide working temperature range(-55~150°C)
- Self-discharge is very low,the shelf-life can be more than 10 years.

Application

- Water meter, Gas meter, Ammeter
- Memory power for many instrument and meter equipment

Li/MnO2 Battery

Characteristics

- High-voltage(3V)
- Suitable for large current
- Low self-discharge rate
- Wide working temperature range (-40~85°C)
- Stable discharge voltage
- Excellent leakage-proof
- Excellent safety characteristics

Lithium Iron Battery

Characteristics

- 1.5V equal to alkaline batteries, carbon batteries
- High current discharge
- High capacity
- Wide working temperature range (-20°C to +60°C)
- Self-discharge is very low, shelf life can be 10 years

Application

Camera, MP3/MP4, flashlight, Remote Controller, Children Toy, Electronic Products

Lithium Ion Battery

Characteristics

- High Energy Density
- Green Energy and pollution-free
- Long cycle life, more than 500 cycles
- No Memory effect

Application

- Flash light, laptop, portabel DVD, speaker, toys, video camera, Robot, etc.
